PROFESSIONAL SUMMARY

Frontend Developer and UI/UX Designer with hands-on experience building and deploying responsive web applications for real clients. Delivered a complete business website achieving a 99/100 Lighthouse performance score. Built FindIt, a full-stack lost-and-found web application with authentication and role-based access. Currently developing a community forum platform for a client using Forumotion. BSCS student at SSUET (CGPA: 3.68) seeking a frontend internship in Karachi or remote.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), HTML5, CSS3, SQL
Frameworks & Libs	React.js, Node.js (learning), Express.js (learning)
Database	PostgreSQL (basics), Supabase
Design & UI	Figma, Tailwind CSS, Responsive Design, Wireframing, UX Research
Tools	Git, GitHub, Netlify, VS Code, REST APIs

WORK EXPERIENCE

- Frontend Web Developer (Freelance) | Zayvo Media • Remote

<https://zayvomediamedia.com>

Sep 2026

 - Architected and deployed complete website for short-form video editing agency from concept to production, achieving premium dark UI design and full responsiveness across all devices.
 - Built custom animations and interactive video sections using HTML5, CSS3, and JavaScript to showcase client's portfolio with enhanced user engagement.
 - Implemented responsive web design with cross-browser compatibility optimization; deployed on modern hosting with custom domain and SSL configuration.
 - Focused on premium design aesthetic with dark theme implementation, modern typography, and smooth performance optimization for video-heavy content delivery.
- Frontend Developer (Freelance) | Client Project — Forumotion Platform • Remote

<https://ashenislesrp.ahlamontada.com/>

Jul 2026

 - Developing a customized community forum platform for a client using Forumotion, focusing on UI customization, layout design, and user experience.
 - Designing and implementing custom CSS themes, responsive layouts, and navigation structures tailored to client requirements.
 - Collaborating with client to gather requirements, present design mockups, and iterate based on feedback.

Frontend Web Developer (Freelance) | Softro Solutions • Karachi

<https://softrosolutions.com>

Apr 2026

- Designed and deployed a complete business website solo from UX wireframes to production, achieving a 99/100 Google Lighthouse performance score.
- Built fully responsive UI using HTML5, CSS3, and JavaScript with cross-device compatibility across mobile, tablet, and desktop.
- Configured custom domain, HTTPS, and hosting on Netlify; delivered on time with zero post-launch issues.
- Collaborated directly with client to gather requirements and iterate on design until sign-off.

Programming Instructor | NCS • Karachi

Sep 2025 – Nov 2025

- Taught programming fundamentals and logic-based problem solving; strengthened technical communication and mentoring skills.

PROJECTS

FindIt — Lost & Found Web Application — React.js, Node.js, Express.js, PostgreSQL, Tailwind CSS, JWT

- Built a full-stack web application where users can post, search, and claim lost or found items with category and location filtering.
- Implemented user authentication with JWT, protected routes, and role-based access (admin vs regular users).
- Designed RESTful API with Express.js and PostgreSQL; deployed frontend on Netlify and backend on Render.
- Integrated Cloudinary for image uploads, allowing users to attach photos to their lost/found listings.

Quiz Portal — Full-Stack Web Application — HTML, CSS, JavaScript, C#, SQL Server

- Built a role-based quiz system with separate teacher and student dashboards, real-time quiz participation, and automated grading.

Tic Tac Toe — Interactive Browser Game — JavaScript, HTML, CSS

- Built a fully functional two-player Tic Tac Toe game with win detection, draw logic, score tracking, and restart functionality.
- Implemented clean game logic and DOM manipulation in vanilla JavaScript — no frameworks or libraries used.

Weather App — REST API Integration — JavaScript, REST APIs, HTML, CSS

- Fetches and displays live weather data by city using async/await API calls; handles errors and loading states.

Spotify Clone — UI Recreation — HTML, CSS, JavaScript

- Recreated Spotify's core UI including playlist layout, playback controls, and fully responsive design from scratch.

EDUCATION

Bachelor of Science in Computer Science (BSCS) | Sir Syed University of Engineering & Technology (SSUET) • Karachi

Oct 2024 – Oct 2028

CGPA: 3.68 / 4.00 | Roll No: 2024F-BCS-253 | Section F

CERTIFICATIONS

Google UX Design Professional Certificate — Google / Coursera 2024
8-course specialization — UX research, wireframing, Figma prototyping, usability testing

Google Prompting Essentials — Google / Coursera 2025
AI prompt engineering and workflow optimization

Java Fundamentals — Great Learning 2024
Core Java and OOP fundamentals

ACHIEVEMENTS & ACTIVITIES

Co-lead, 'Code in the Dark' Programming Competition

Organized and managed a competitive blind-coding event; handled logistics, challenges, and participant experience.
